## **BUSINESS REFERENCE SOURCES available at URRLS**

**Reference USA** is a division of **Info USA** which is recognized as a leader in marketing databases. **Reference USA** is a subscription database which can provide custom data lists of businesses nationwide. Every single business in the database is contacted and updated at least once a year so the information is current and reliable. If you are searching for a particular business, or type of business, you can find it here. It is the only source that covers even the smallest local businesses which may have as few as 1 – 4 employees. This database captures businesses that are too small to be included by many of the big business publishers. For example, an insurance sales professional may want a contact list of all the mom-and-pop businesses in their community. Or perhaps, you are going to interview for employment and would like a bit of background data on a company. Reference USA can provide not only parent companies and subsidiaries but also credit rating, sales volume, number of employees, CEO contact information and often even annual reports for a company. **For this sort of research, please call the Library Reference Hotline at (800) SOLVE ME or (800) 765-8363 and leave your request for information or call (706) 342-4974 Ext. 19 to speak directly with Ana Kadhum, Senior Reference Librarian.**

The archives of **The Atlanta Journal and Constitution** (back to 1985) are available at your library. Access full-text content of local and regional news, including community events, local companies, state industries, and people in the community. Paid advertisements are excluded.

**BUSINESS SOURCE PREMIER (on Galileo)** provides full-text for over 2,280 journals covering all aspects of business from 1990 to the present and is updated daily. It includes popular business publications such as *Business Week*, *Forbes*, and *Harvard Business Review*.

**GEORGIA CAREER INFORMATION SYSTEM (on Galileo)** is an interactive product that offers career profiles, employment and occupational outlook, with a particular focus on Georgia. It is a full-text database and is updated daily.
